| Efficiency: NEMA premium 12.1  | 2                              |
|  |                                |
| MAXIMUM PUMP OPERA   | TING CONDITIONS                |
| <b>ANSI 125</b><br>175 psig at 140°F (12 bars at 60'<br>100 psig at 300°F (7 bars at 149 | •                              |
| ANSI 250   | *                              |
| 275 psig at 100°E (26 bars at 28   | 3°C)                           |

275 psig at 300°F (26 bars at 38°C) 275 psig at 300°F (19 bars at 149°C)

- Tolerance of ±0.125" (±3 mm) should be used
- For exact installation, data please write factory for certified dimensions
- Pump equipped with casing drain plug and ¼" NPT suction and discharge gauge ports

### **OPTIONAL EQUIPMENT**

# CONTROLS DATA

| Sensorless Control:                       | Standard   |
|---|--|
| Minimum system pressure to be maintained: | ft (m)*  |
| Protocol (standard):                      | □ Modbus rtu □ bacnet™ ms/tp<br>□ Johnson® n2 □ Siemens® fln   |
| Protocol (optional):                      | □ LonWorks <sup>®</sup>  |
| Enclosure:                                | □ Indoor – UL TYPE 12  |
| Fused disconnect switch:                  |  |
| ЕМІ/RFI control:                          | Integrated filter designed to meet<br>EN61800-3  |
| Harmonic suppression:                     | Dual DC-link reactors (Equivalent: 5%<br>Ac line reactor) Supporting IEEE<br>519-1992 requirements** |
| Cooling:                                  | Fan-cooled through back channel  |
| Ambient temperature:                      | -10°C to +45°C up to 1000 meters above sea level (-14°F to +113°F, 3300 ft)                          |
| Analog ı/o:                               | Two current or voltage inputs, one current output  |
| Digital ı/o:                              | Six programmable inputs (two can be configured as outputs)   |
| Pulse inputs:                             | Two programmable   |
| Relay outputs:                            | Two programmable   |
| Communication port:                       | 1-RS485, 1-USB   |

\*If minimum maintained system pressure is not known: Default to 40% of design head \*\*The IVS 102 drive is a low harmonic drive via built-in DC line reactors. This does not guaranty performance to any system wide harmonic specification or the costs to meet a system wide specification. If supplied with the system electrical details, Armstrong will run a computer simulation of the system wide harmonics. If system harmonic levels are exceeded Armstrong can also recommend additional harmonic mitigation and the costs for such mitigation.

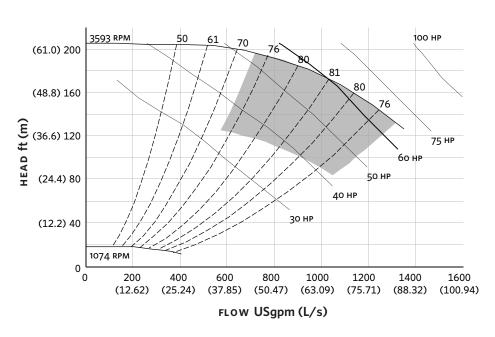

#### MECHANICAL SEAL DATA

| Seal type: AB2          | St |
|-------------------------|----|
| Secondary seal: Viton   | Ro |
| Spring: Stainless steel |    |

Stationary seat: Sintered silicon carbide Rotating hardware: Stainless steel
