TORONTO, August 20, 2014 - Armstrong Fluid Technology has announced the expansion of its Astro wet-rotor circulator offering with the introduction of the Astro 2 Series. Featuring four new sizes, the Astro 2 Series now offers flange-to-flange and bolt-to-bolt compatibility with 100% of competing models in terms of performance.

Designed for fast and convenient installation and years of trouble-free operation, the new models also address a broader range of applications. Key features include: three field-selectable operating speeds, double the head and triple the flow, a plug-in terminal strip to save time on installation, e-coating on the inside of the cast iron volutes to provide enhanced corrosion protection, pre-installed high-flow check valve and availability in cast iron, stainless steel and lead-free bronze.

In addition, Armstrong has announced an industry-leading five-year warranty on both the Astro and Compass Circulators. Commenting on the company's commitment to a five-year warranty, Rod Hightower, Armstrong's Commercial Director, US stated, "The five-year warranty is a reflection of the quality and reliability built into these products."

About Armstrong Fluid Technology

With more than 1000 employees worldwide, operating seven manufacturing facilities on three continents, Armstrong Fluid Technology is known around the world as a leader and innovator in design, engineering and manufacturing of integrated solutions within the building oriented fluid-flow equipment industry. Armstrong products are internationally recognized for design innovation, quality, long service life, and superior operating economy.
