**Toronto, Canada, [January 9, 2025]**— [Armstrong Fluid Technology](#), a global leader in intelligent, energy-saving fluid-flow and whole-building mechanical solutions, has named Chintan Kharche as Global Director of Offering Management, a strategic role that will shape the future of five major product lines. In this role, Chintan will lead innovation across the entire product lifecycle, driving market research, competitive analysis, product planning, and launches. His mandate: deliver intelligent, energy-saving solutions that elevate customer experience and strengthen Armstrong's position as a global leader in sustainable whole building mechanical solutions.

“I’m excited about Armstrong’s approach—using Envelope solutions to reduce energy consumption at both subsystem and entire system level,” said Chintan. “Armstrong has demonstrated impressive results over many years, and I look forward to building on this momentum as we deliver on the company’s vision.”

Chintan Kharche brings over 18 years of global leadership experience across HVAC, renewables, industrial automation, and power electronics, with a strong focus on sustainability. He joins Armstrong from Danfoss, where he served as Senior Director of Product Management for HVACR & AQUA Drives, leading portfolio strategy, product roadmaps, and Agile-driven development. Previously, as Head of Strategic Portfolio Management & Strategy Excellence at Danfoss, he shaped the strategic direction of AC drives and spearheaded high-impact initiatives to advance energy-efficient solutions.

“Chintan brings a wealth of experience that will accelerate innovation across our product lines,” said Charles Armstrong, Executive Chairman at Armstrong Fluid Technology. “His appointment underscores Armstrong’s commitment to advancing intelligent, energy-saving fluid-flow solutions for a more sustainable future.”

In his global mandate, Chintan will collaborate with product line leaders to accelerate innovation, optimize lifecycle performance, and scale energy-saving building mechanical solutions for customers worldwide.

### **About Armstrong Fluid Technology**

Armstrong Fluid Technology is a global leader in intelligent, energy-efficient fluid-flow and whole-building mechanical solutions. With operations worldwide, Armstrong helps organizations eliminate inefficiency, improve system reliability, and reduce operating costs through innovative products and digital solutions. Serving multiple industries, the company is committed to sustainability and aims for net-zero carbon operations by 2030. Armstrong has earned recognition such as the Queen's Enterprise Award for Sustainability and the Decarbonisation Excellence award from ISHRAE CoOL Conclave.
