

Armstrong Fluid Technology Environmental Policy

We are global experts in fluid solutions that provide both lowest installed cost and lowest operating cost for HVAC, Fire, and Plumbing applications in Buildings.

Our services include:

- Product solutions - **Standard Building Products, Configured Building Equipment, Industrial & Mining Systems** (Pumps, Pressurization Units, Booster Sets, Hydraulics, Heat Exchangers),
- System solutions - **Building Systems Solutions**, Packaged plant solutions, Integrated Controls systems (IVS, Design Envelope), Fire sprinkler pump solutions,
- Services solutions - Field Service, Technical Support, Design Assist and Energy Services.

The Armstrong vision is to be a life cycle partner to building owners and operators with an offering that enables us to support a customer at any point through the life of a building.

In support of this, Armstrong Fluid Technology will maintain an Environmental Management System, as part of its Integrated Management System, in accordance with the requirements of ISO14001. Consideration of environmental issues will be taken into account when producing our Company's objectives.

We are committed to:

- Meeting compliance obligations towards applicable environmental legislation and other environmental requirements.
- Conducting regular management reviews of our environmental performance, so as to enhance our performance. This includes reviewing our objectives which contribute to achieving continual improvement.
- Ensuring openness of our environmental activities with all stakeholders including employees, customers, suppliers and regulators.
- Providing continual training, and involving all employees in our environmental improvement program.
- Working with our customers to produce products which can contribute to the reduction of environmental impacts for the customer and our company.
- Protecting our environment through minimization of waste through reuse and recycling, sending waste to landfill as a last resort, and ensuring safe disposal when no viable alternative is available.
- Minimizing energy usage by involving all members of staff in energy conservation initiatives.
- Preventing pollution through training and awareness.

This policy is not in any way restricted and is available to anyone requesting a copy, including members of the public.
