

# PUMP MANAGER, CLOUD SERVICE

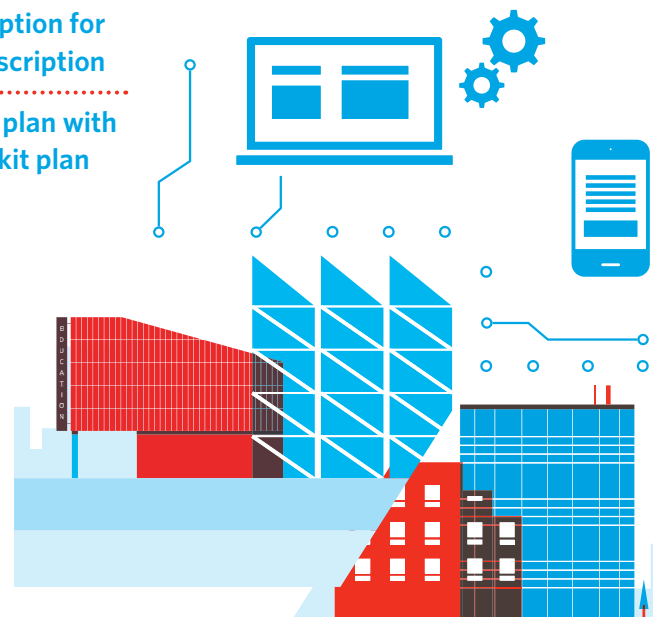

A cloud-based  
Active Performance  
Management  
service for Design  
Envelope pumps

## WHAT'S INCLUDED:

1-year Pump Manager subscription for  
up to 8 pumps on a single subscription

Includes 1-year SIM card data plan with  
pre-paid, secure connectivity kit plan

## BENEFITS IN THE DIFFERENT STAGES OF THE BUILDING LIFECYCLE:

### CONSTRUCTION

From day one, ensure:

System resilience by enabling Active Performance Management

Asset and system operations are aligned with design intent

Structured stakeholder collaboration through data driven accountability

Deployment of data-reporting systems to validate future designs and resulting

### CONSTRUCTION

Troubleshoot faster and minimize call-backs

Demonstrate proof of job completion with digital report

Support dispute resolution in case of equipment damage from system failure

Save up to 15% in service-related costs

### COMMISSIONING

Data analytics to ensure optimal system optimization from day one and make it possible later to demonstrate credibility on equipment performance before building hand-over

### OPERATION & MAINTENANCE

Get peace of mind, knowing your equipment is actively being managed

Visibility into asset performance and records - identify, troubleshoot, and resolve issues faster before they become catastrophic

Connect with the appropriate support network to resolve issues quickly

Improve asset reliability, availability, and performance for occupant comfort

Reduce operating costs - save up to 30% energy cost and up to 50% maintenance cost
