7 bar at 150°c (100 psig at 300°F)	:		Two programmable		
□ PN 25	:	Communication port:			
25 bar at 65°C (362 psig at 149°F)					
21 bar at 150°C (304 psig at 300°F)		** If supplied with the system e			
	:	simulation of the system wid		-	
MECHANICAL SEAL DESIGN DATA		exceeded Armstrong can also recommend additional harmonic mitigation			
See file no. 43.50 for standard mechanical seal indicated below	l details as	and the costs for such mitiga	ition.		
Armstrong seal reference number	:	FLOW READOUT ACC	URACY		
☐ c1 (a) ☐ Others:		The Design Envelope model selected will provide flow reading			
	:	on the controls local keyp	•	_	

Manager. The model readout will be factory tested to ensure

±5% accuracy.

2

OPTIONS

SENSORLESS BUNDLE (STANDARD)

Operation of pump without a remote sensor. Includes:

- Sensorless control
- Flow readout
- Constant flow
- Constant pressure

 $\begin{array}{c} \mbox{Minimum system pressure to be maintained} \\ \mbox{m (ft)} \end{array}$

* If minimum maintained system pressure is not known: Default to 40% of design head

□ PARALLEL SENSORLESS

Operation of multiple pumps without a remote sensor

Minimum system pressure to be maintained m (ft)

* If minimum maintained system pressure is not known: Default to 40% of design head

☐ ENERGY PERFORMANCE BUNDLE

Provides energy savings on oversized systems by adjusting pump parameters to on-site conditions. Includes:

- Auto-flow balancing Automatically determines control curve between design flow at on-site system head, and minimum (zerohead) flow for energy savings
- Maximum flow control Limits flow rate to pre-set maximum for potential energy savings

Maximum flow rate L/s (gpm)

□ PROTECTION BUNDLE

Protects other flow sensitive equipment by setting limits of pump operation. Includes:

- Minimum flow control Attempts to maintain flow rate to pre-set minimum to protect equipment in system
- Bypass valve control Actuates a bypass valve to protect flow sensitive equipment if pre-set minimum flow rate is reached

Minimum flow rate L/s (gpm)

☐ ZONE OPTIMIZATION BUNDLE

Controls pumps to ensure multiple zones are satisfied for heating or cooling

• 2 sensor control – Controls pumps in a 2-zone application to ensure both zones are always satisfied for heating or cooling

\square DUAL SEASON SETUP

Pre-sets heating and cooling parameters for pumps in 2-pipe systems

Cooling

Duty point	L/s (gpm) at	m (ft)
Minimum syster	m pressure to be mainta	ained
	m (ft)	
Heating		
Duty point	L/s (gpm) at	m (ft)
Minimum systei	m pressure to be maint	ained
	m (ft)	

OPTIONAL SERVICES

ON-SITE PUMP COMMISSIONING

Where purchased and applicable, onsite commissioning by an Armstrong representative will include setting up communication with the Pump (not wiring to BAS), adjusting parameters to match on-site conditions, register the pumps for enhanced warranty and connect the pumps to the router as part of the activation of Pump Manager.

PUMP MANAGER

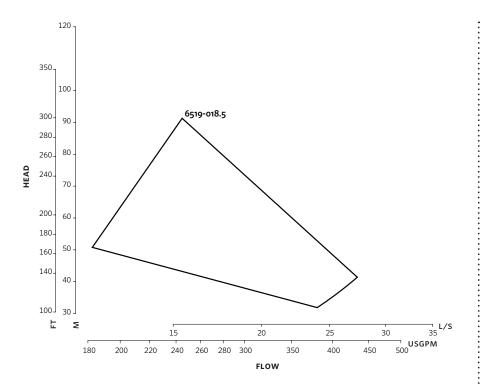

As a Performance Management Service, Pump Manager is an online automated fault detection and diagnostic service for sustained performance and enhanced reliability. It includes advanced trending, alerts of variance in performance and automated reports.

Available in yearly increments. Includes an option for a price discount on the Extended Warranty Service.

^{*}Only available if sensorless bundle is enabled

^{*}Only available if sensorless bundle is enabled

^{*}The Service requires an active internet connection.

Performance curves are for reference only.

Confirm current performance data with Armstrong ADEPT Quote or ADEPT Select selection software.
