MECHANICAL SEAL DESIGN DATA See file no. 43.50 for standard mechanical seal details	**The IVS 102 drive is a low harmonic dr guaranty performance to any system	re is not known: Default to 40% of design head ive via built-in pc line reactors. This does not wide harmonic specification or the costs to supplied with the system electrical details,	
indicated below	Armstrong will run a computer simula	ation of the system wide harmonics. If system	
Armstrong seal reference number	harmonic levels are exceeded Armstr mitigation and the costs for such miti	ong can also recommend additional harmonic gation.
